MT90 | User Manual

Thanks for purchasing this Meitrack MT90. This device will provide you high quality GPS tracking service based on Meitrack's exceptional technology and standards.

This user manual has been specially designed to guide you through the functions and features of your MT90.

- Please read this manual carefully before using your device to ensure safe and correct use.
- The descriptions of your manual are based on the default setting of MT90.
- Please keep this manual for future reference.

Warm Tips

Choose a rate plan wisely: Your MT90 can use up Internet bandwidth quickly. Before you use your MT90, we strongly recommend that you talk to your mobile operator about data rates. If you're on a standard data plan, the costs could really add up. Switching to a flat-rate plan could be a lot cheaper.

MT90 Applications

- › Personal Tracking and Protection
- › Pet Tracking
- › Assets Tracking and Security
- › Vehicle Tracking

MT90 Features

- › SiRF IV GPS and Quad Band GSM 850 / 900 / 1800 / 1900Mhz
- › Small in Size (77x47x20mm) and Light in Weight (65g)
- › Waterproof IP65
- › Low Power Consumption and Long Standby Time
- › GPS and GSM Base Station of Bi-module Positioning
- › Track by SMS / GPRS (MEITRACK Protocol)
- › Inbuilt Accelerometer Sensor
- › Inbuilt Battery

MT90 Main Functions

| | | |
|-----------------|------------------------|------------------------------|
| Track on Demand | Track by Time Interval | Track by Distance Interval |
| Two-way Audio | Data Logger | SOS Alarm |
| Geo-fence Alarm | GPS Blind Area Alarm | Low Battery Alarm |
| Speeding Alarm | Mileage Report | Listen-in (Voice Monitoring) |

MT90 Specifications

| Item | Specifications |
|-------------------|--|
| Dimension | 77 x 47 x 20mm |
| Weight | 65g |
| Charging Voltage | Mini USB charging interface, DC4.2V~5.5V / 400mA |
| Back-up Battery | 1100mAh / 3.7V rechargeable and replaceable lithium-ion battery(NokiaBL-5C compatible) |
| Power Consumption | 65mA standby current |

| Item | Specifications |
|-----------------------|---|
| Operating Temperature | -20°C~55°C |
| Humidity | 5%~95% |
| Work Time | 45 hours in power-saving mode and 14 hours in normal mode |
| LED | 2 LED lights to show power, GPS, GSM and other status |
| Button | 5 Buttons for making phone call and sending SMS |
| Microphone/Speaker | Internal microphone and speaker |
| Memory | 8MB |
| Sensor | Accelerometer |
| GSM Frequency | GSM850 / 900 / 1800 /1900MHz |
| Channel | 48 channels all-in-view tracking |
| GPS Chip | Latest GPS SiRF IV chipset |
| GPS Sensitivity | -163Db |
| Positioning Accuracy | 10 Meters, 2D RMS |

Inside the Box

Please check your product box for the following items:

- › MT90 Device
- › Battery
- › USB Cable
- › Travel Adapter (Charger)
- › Mini Screwdriver
- › Lanyard
- › User Manual, Warranty Manual and CD

Soft Reminder: Use only Meitrack-approved software. Pirated or illegal software may cause damage or malfunctions that are not covered by Meitrack's warranty. The supplied accessories perform best for your device.

Your MT90

| No. | Item | Description |

LED Indications

Long press the switch for 2 seconds to turn on / off MT90.

| GPS LED Flashlight (Blue) | | GSM LED Flashlight(Green) | |
|--|----------------------------|---|--------------------------------------|
| On | Charging | On | A call is coming in or busy |
| Flashing (every 5 seconds) | Sleeping | Flashing (every 5 seconds) | Sleeping |
| Flash (1 second on, 1 second off) | No GPS fix or initializing | Flashing (1 second on and 1 second off) | No GSM signal or initializing |
| Off | GPS fix | Off | MT90 is connected to the GSM network |
| Fast Flash (0.3 second on, 0.3 second off) | Low battery | | |

Getting Started

1. Remove the Battery Cover

With the device turned off, place your MT90 with the front facing down. Use the mini screwdriver to remove the two screws to release the back cover. Lift up the back cover from the notch at the bottom of the device.

2. Insert the SIM Card

Place the SIM card into the device with the gold-colored side facing down.

Note: Make sure there is enough credit on the SIM card. It is also important that the SIM card has Called ID Display function. If you will be using the GPRS function, you should pay attention to the current SIM card GPRS charge.

3. Insert the Micro SD Card

Insert the Micro SD card into the slot with its gold contacts facing down and push it until it clicks into place.

4. Insert the Battery

Insert the contacts side of the battery first and then gently push the battery cover into place.

Notes: Battery performance depends on many factors, including signal strength, the temperature of the environment in which you operate your phone, the features and/or other program usage patterns.

5. Charge the Battery

The battery is partially charged when shipped. Before using the device for the first time, it is recommended that you charge the battery for 8 hours. Connect one end of the USB cable to the device, and the other end of the USB cable to the USB port of the AC adapter. Please charge the battery for 8 hours for the first time by turning off the device.

Note: While charging, the device may heat up. This is normal and should not affect your device's lifespan or performance. If the battery is low, it may affect the positioning effect and data transfer. Please charge the battery before using.

6. Charge with the Travel Adapter

Open the cover of the multifunction jack of the device. Plug the small end of the adapter into the multifunction jack. Then plug the larger end of the travel adapter into a power outlet.

Note: Improperly connecting the travel adapter can cause serious damage to the device. Any damage caused by misuse is not covered by the warranty.

7. Attach A lanyard

Slide the lanyard through the slot and hook it over the small projection.

Once you've installed your battery, SIM card and Micro SD card, you can turn on your device and start using it.

When you turn on the device for the first time, you will be promoted to set up your device. For more information on how to set up your device, please read the following instructions.

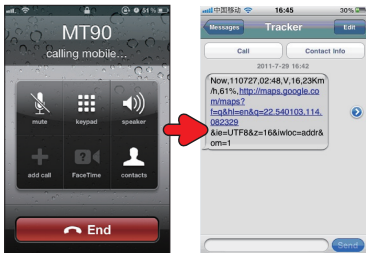

Quick Operation Instruction

Operation Tips: To properly use the MT90, common parameters should be set in advance before initial use. This can be done by using the parameter editor or by sending SMS commands to the device. Doing so will adapt the tracker to local time, allowing you to better enjoy the GPS service of Meitrack.

1. Real-time Location Tracking

This location-tracking for knowing the current location of MT90, to ensure normal function of the GPS signal.

- Call the SIM card number embedded in MT90, hang up till the dial sound 2-3 times, as follows:

If your phone does not support direct access, you can enter longitude and latitude to the URL to check the location. maps.google.com

In the SMS, the values after “lat” is the latitude, the values after “lng” is the longitude.

** Meitrack Manager and SMS command. The default password is 0000, password can be revised through Meitrack Manager and SMS command. MT90 will only accept commands from a user with the correct password and report SMS report to the user. If preauthorized phone number was*

set, only this phone number can receive SMS reports. The common format of SMS command is:

Password,Command,Parameter

2. SOS

This command is to set the SOS emergency communications number, call the phone number, inform the location by SMS and other SMS additional features at the same time.

- › The Content of Mobile Phone SMS:

0000,A71, Function Number 1, Function Number 2, Function Number 3

Sent to the embedded SIM card numbers.

(Tips: ", " should be English comma and no space before and after the comma)

- › MT90 automatic reply SMS:

IMEI, A71, OK

Prompts successful, successfully set up SOS emergency communications number.

- › When you press the SOS emergency button, MT90 will dial 3 function phone numbers. It will stop dialing when one number answers.

Note: The default value is empty, if the function numbers are less than three while setting, it must be add ", " to avoid setting failure. The last function number doesn't need a ", ". For example:

0000,A71,13500000000,, 0000,A71,13500000000,13600000000,

0000,A71,13500000000,13600000000,13700000000

To clear the combination of functions directly sending **0000, A71**

** If this function can't be achieved, please add your Country and Area Code before your phone number when you set the function numbers, or you can also consult your local mobile operator.*

3. Listening-in (Voice Monitoring)

This command enables users to listen-in to the surrounding environment. Configuring this feature will allow the devices to confidentially and automatically answer and allow listening-in, one-way voice communication.

- › The Content of Mobile Phone SMS:

0000, A72, Monitor Number 1, Monitor Number 2

- › Sent to the embedded SIM card numbers.

IMEI, A72, OK

Successfully set up monitor number.

- › When the pre-set monitor number calls the MT90, the device will answer automatically and enter into the listening state. It will not emit any sound.

Note: The default value is empty, if the monitor numbers are less than two while setting, it must be added “,” to avoid setting failed.

To clear the combination of monitor number directly sending **0000, A72**

** If this function can't be achieved, please add your Country and Area Code before your phone number when you set the monitor numbers, or you can also consult your local mobile operator.*

4. Sleep Mode

This command enables the sleep mode function. In this mode, logging, timing and location are all disabled.

- The Content of Mobile Phone SMS:

0000, A73, sleep levels

Sent to the embedded SIM card numbers.

- MT90 automatic reply SMS:

IMEI, A73, OK

Prompt successfully.

- To restart the Log or regular position, you must first cancel the sleep mode.

Note:

X=0, turn off sleep mode (default)

X=1, normal sleep. GSM module work, GPS module work by sleep mode intermittently. The device can work 25% longer than no sleep mode.

Note: this is not recommended for users who set “track by interval” or short time interval, because it will affect the completeness of tracking.

X=2, deep sleep, the tracker will enter this mode after it is inactive or stationary(No SOS/any triggered by the button/input/incoming calls/message) for 5 minutes. GPS module stops working and GSM module enters sleep mode. The tracker remains in this mode until it is activated by SOS/any triggered by the button/input/incoming calls/message. After that, it will repeat above processes.

MT90 can enter sleep mode under movement , and movement can't wake MT90 from sleep mode.

In any condition, the device will directly quit the sleep mode and back to normal working mode by SMS or GPRS command to turn off the sleep mode.

5. Time Zone

This command modifies the SMS report to display the correct local time. Default Beijing time, GMT480. Please follow below instructions for time zone modification.

- › The Content of Mobile Phone SMS:

0000, B35, 480

Sent to the embedded SIM card numbers.

- › MT90 Automatic Reply SMS:

IMEI, B35, OK

Set up the time zone successfully.

Note: This value is your MT90's IMEI number. The device will send this data automatically and these numbers do not represent anything significant to the functionality of the tracker. Below the same applies.

6. More Settings

You can configure MT90 by mobile phone or by computer using the Meitrack Manager to Setting Multiple Software. For more details, please refer to "Configuration by Computer".

For more details regarding SMS commands, please refer to MEITRACK SMS Protocol.

Configuration by Computer

This part mainly shows you how to use the Meitrack Manager. Please refer to the Meitrack Manager User Guide for more information regarding configuration and functions.

Install the MT90 software of Meitrack Manager

Find the software of Meitrack Manager from the CD.

setup.exe

Install it following the steps, and find the application icon of Meitrack Manager.

Meitrack
Manager

Connect MT90 with computer, and sync the setting of Meitrack Manager.

Connect USB cable with the USB port in the computer, and connect the other end to the MT90 device.

Run 'Meitrack Manager.exe', it will detect Comm port and read all MT90's parameters automatically:

The screenshot displays the Meitrack Manager application window. The title bar reads "Meitrack Manager". Below the title bar, there are four tabs: "Tracker", "SMS", "GPRS", and "GPS Log". The "Tracker" tab is currently selected.

The main content area is divided into several sections:

- Tracker Information:** "Tracker IMEI" is 861785009781620, "Firmware" is MT90CN_FW1.18B, and "Rename" is MT90. A "Save" button is next to the rename field.
- Settings:** Includes checkboxes for "Light Off", "Turn off Incoming Call", "Disable GPRS Button", and "Disable GPSLog Button".
- Battery:** "Battery Left" is shown as a progress bar at 50%.
- Sleep Mode:** Radio buttons for "No Sleep" (selected), "Normal Sleep", and "Deep Sleep".
- Log data:** Input field with "0131072" and a "Clear" button.
- Buffer:** Input field with "08192" and a "Clear" button.
- SMS:** Input field with "0256" and a "Clear" button.
- Log Interval:** Input field with "0" and "Seconds", with a "Save" button.
- Device Connection:** Radio buttons for "Check Device Automatically" (selected) and "Set Device Connection". A dropdown menu shows "COM1" and a "Confirm" button.
- Upgrade:** Radio buttons for "Do you want to upgrade?" with "Yes, I would like to receive automatic updates about new features." (selected) and "No, I don't need it.". An "Upgrade" button is present.
- Bottom Buttons:** "Refresh", "Restore Factory Settings", "Save Settings", and "Load Settings".

The status bar at the bottom shows "0/0" on the left and "1.19006.9021" on the right.

SMS Tracking

The screenshot shows the Meitrack Manager web interface with the following configuration details:

- Tracker:** SMS (selected), GPRS, GPS Log
- SMS Password:** 0000
- SMS Timezone:** 480 Minutes
- Authorization No.:** 13500000000, 13600000000
- SOS Call:** (1st), (2nd), (3rd)
- Reject Incoming Call:** (1st), (2nd), (3rd)
- Auto Answer Incoming Call:** (1st), (2nd), (3rd)
- Location Report:** (1st), (2nd), (3rd)
- SOS Alarm:** SOS (1st), (2nd), (3rd)
- Low Battery Alarm:** Low Battery (1st), (2nd), (3rd)
- Speeding Alarm:** Speeding (1st), (2nd), (3rd)
- Max Speed:** 0 Km/h
- GPS Blind Alarm:** Enter Alarm: No Fix (1st), (2nd), (3rd); Exit Alarm: Fix (1st), (2nd), (3rd)
- Monitor Phone No.:** (empty)
- SMS Track No.:** (empty)
- SMS Report Interval:** 0 Minutes
- Auto Report Times:** No Limit

Buttons: Save (multiple instances)

Footer: 0/0 | 1.1.9006.9021

| Items | Descriptions |
|----------------------|---|
| SMS Password | The defaulted value 0000 of SMS password for sending SMS commands by mobile phones. |
| SMS Time Zone | <ul style="list-style-type: none"> ➤ Default time of the tracker is GMT 480, you can use this to correct the trackers time to your local time for SMS report. ➤ minute = 0, GMT 0 (default); ➤ minute = [-32768,32767], set time difference in minutes to GMT. ➤ Time zone for SMS is the same as GPS Log, but separate from GPRS packet. |
| Authorization No. | A phone number to receive SMS reports, incoming call and selected event reports. |
| SOS Call | Press SOS button and make a call to authorized phone No. |
| Reject Incoming Call | Hang up automatically when an incoming call is received from correspondent authorized phone No. |

| Items | Descriptions |
|---------------------------|---|
| Auto Answer Incoming Call | Auto answers incoming call from authorized phone No. and enables two-way audio. |
| Report SMS Location | Report SMS location after receiving an incoming call. |
| SOS Alarm | Report to authorized phone No. when SOS button is pressed. SMS header defaulted as "SOS". |
| Low Battery Alarm | Report when backup battery's voltage is below 3.5V. SMS header defaulted as "Low Battery". |
| Speeding Alarm | Report when MT90 speeds higher than the pre-set value. SMS header defaulted as "Speeding". |
| GPS Blind Area Alarm | <ul style="list-style-type: none"> ➤ Enter Alarm: report when MT90 enters GPS Blind Area. SMS header defaulted as "No Fix". ➤ Exit Alarm: report when MT90 exits GPS Blind Area. SMS header defaulted as "Fix". |

| Items | Descriptions |
|-------------------------|--|
| Sleep Alarm | <ul style="list-style-type: none"> ➤ Enter Alarm: report when MT90 enters sleep mode. SMS header defaulted as "Enter Sleep". ➤ Exit Alarm: report when MT90 exits sleep mode. SMS header defaulted as "Exit Sleep". |
| Distance Interval Alarm | Report when MT90's journey reaches pre-set distance. Distance is in meters. SMS header defaulted as "Distance". |
| Reboot | Report when MT90 reboots. SMS header defaulted as "Reboot". |
| Geo Fence Alarm | <p>Geo-fence is circle with preset radius. Max 8 Geo-fence waypoints can be set.</p> <ul style="list-style-type: none"> ➤ Enter Alarm: report when MT90 enters Geo-fence. SMS header defaulted as "Enter GEO". ➤ Exit Alarm: report when MT90 exits Geo-fence. SMS header defaulted as "Exit GEO". ➤ Add New: set radius latitude and longitude, or draw Geo-fence on map directly in circle. |

| Items | Descriptions |
|-------------------|--|
| Monitor Phone No. | <ul style="list-style-type: none"> ➤ Authorize a phone number to make a silent call to the tracker. The tracker will answer the call automatically which allows the caller to listen to what is happening around the tracker. There is no voice indication that the call is in progress. ➤ Phone Number: Max 2, 16 characters. If no preset phone number, it is empty (default). |
| SMS Track No. | <ul style="list-style-type: none"> ➤ Authorize a phone number to receive SMS report by time interval. ➤ SMS Report Interval: = 0, stop tracking by time interval (default); = [1,65535], track by interval in minute. ➤ Auto Report times: = no limit, unlimited times for report; = [1,255], it will stop reporting when reaching preset times. |
| Save | Save above settings to the tracker. |

GPRS Tracking

The screenshot shows the Meitrack Manager software interface for GPRS configuration. The window title is "Meitrack Manager" and it has tabs for "Tracker", "SMS", "GPRS", and "GPS Log". The "GPRS" tab is selected.

For more details on SMS or GPRS settings, please refer to MEITRACK SMS / GPRS Protocol.

Log on GPS Platform

Please register and log onto our free GPS platform by: <http://www.meigps.com>

Login: IMEI No.

Password: 0000(Default)

The function on the GPS platform can be realized as follows:

- › Snail Tracking
- › Geo-fence Control
- › Receive and Display Alarms
- › Report and Statistics
- › Online Configuration

For more information about our GPS platform, please refer to Meitrack Family Personal Edition User Guide.

Please do not hesitate to email us at info@meitrack.com if you have any questions.

Safety and Usage Information

Handle and dispose of batteries and chargers with care

Use only Meitrack-approved accessories specially designed for your device. Incompatible accessories can cause serious injuries or damage to your device.

- Never place batteries or devices on or in heating devices, such as microwave ovens, stoves, or radiators. Batteries may explode when overheated.
- Never crush or puncture the battery. Avoid exposing the battery to high external pressure, which can lead to an internal short circuit and overheating.

Correct Disposal of Batteries of MT90

(Applicable in the European Union and other European countries with separate battery return system).

This marking in the battery, manual or packaging indicates that batteries on this product should not be disposed of with other household waste at the end of their working life. If batteries are not properly disposed of, these substances can cause harm to human health or the environment.

To protect the natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.
