## 1. Notice

### 1.1 Usage Information

- This product is a wireless communication terminal, please turn off the device before getting into the oil depot, places of dangerous goods, restricted area.
- The installation is not appropriate in the condition of rain and high temperature exposure.
- This product with GPS tracking function, there are irresistible factors (Such as bad weather, the wireless signal shielding, ect) caused by the phenomenon cannot be located.
- This product applies the wireless network transmission, in order to achieve better signal, when you use an extension cord terminal into place without metal shield.
- The operating voltage of this product is DC12, and cannot be installed with 24V or 36V, otherwise it will lead to the machine burned out, and not included in the warranty term.
- To ensure that the car is turned off during the period of installation, plug in the terminal and then start the vehicle.
- If your OBD position is far away which will affect the GPS signal receive, optional OBD extension cord will be able to ensure the normal reception of the GPS signal.
- In order to prevent malicious dismantled, placed a cooler in the car and receive GPS signals and machine hidden OBD extension cord, increase demolition difficulty and to extend the on-site time.

### 1.2 Product Accessory

Get the terminal, please confirm the following list of standard parts optional accessories for on-demand purchase.

Standard Accessory			Optional Accessory		
Number	Item	Quantity	Number	Item	Quantity
1	TC68 Device	1 Set	1	OBD Extension Cord	1 pc
2	USB Cable	1 pc	2	Velcro	1 pc
3	Quick Operation Instruction	1 pc	3	Micro SD Card (2G, Map Card)	1 pc
4	Warranty Card	1 pc			
5	Certificate of Quality	1 pc			
6	CD (Including Use Manuals, Software )	1 pc			
7	Packing	1 Set

## 2. Product Function and Specifications

### 2.1 Introduction

TC68 is a GPS vehicle tracker with OBD II (On-Board Diagnostics II) functions, which can achieve vehicle positioning, tracking and anti-theft, vehicle examination and fault diagnosis. With standard OBD II plug. TC68 can be easily and quickly installed. Built-in battery provides TC68 with sufficient backup power. When TC68 is being removed, it will send alert notification to mobile devices or servers.

TC68 is suitable for all private cars and other vehicles with OBD II plug.

### 2.2 Specifications

Items	Specification
Dimension	69.8*51.8*31.8 mm
Weight	60g
Input Voltage	DC 12V/1A
Back-up Battery	150mAh/3.7V
Power Consumption	100mA
Operating Temperature	-20℃~55℃
Humidity	5%~95%
Work Time	7 hours in power-saving mode and 1.5 hours in normal mode
LED	2 LED lights to show GPS/GSM status
Button	1 pc SOS button, 1 pc power button
Microphone/Speaker	Internal microphone and speaker
Memory	8MB Byte
Sensor	Accelerometer/Vibration sensor
GSM Frequency	GSM 850/900/1800/1900MHz
GPS Chip	Latest GPS SIRF-Star IV chipset
GPS Sensitivity	-163dB
Positioning Accuracy	10 meters
Input/ Output	1 port for USB cable

### 2.3 Product Function

#### 2.3.1 GPS Tracking

Function	Description
Real time Tracking	Send commands and instantly access to the current terminal location information to the platform or mobile phone.

File Name	MEITRACK TC68 User Guide	Creator	Renny Lee
Project	TC68	Creation Date	2012-07-13
		Update Date	2012-11-28
Sub Project	User Guide	Page	5 of 26
Revision	V1.5	Confidential	External Documentation

Timing Tracking	Set the time interval of timing tracking, the terminal will be in accordance with the preset time reported location information at interval to the platform or mobile phone.
Distanced Tracking	Set interval given distance from the tracking, the terminal will be reported in accordance with the preset distance interval location information to the platform.
Turn Report	Set the turning point, the process of the vehicle turning angle greater than the angle will be reported to the location information, added when the line came a turning intersection did not encounter the transmission timing or route fixed pitch tacking data case.

### 2.3.2 Alarms

Function	Description
Disassemble Alarm	Alarm will be generated when the device is removed from the OBD socket notification platform or mobile phone users.
Speeding	Set a maximum speed limit through platform, exceeding the speed value, terminal generates alarm.
Electronic Fence	By setting the center coordinates, radius circular electronic fence; In/out of the fence can be reported to the platform or SMS to remind the user can set up to eight circular areas.
SOS	Press the SOS button to generate alarm.
Low Power Alarm	The external power supply is less than 10V to generate an alarm.
Terminal Status Alarm	Terminal boot, restart alarm.

### 2.3.3 The Automotive Fault and Safe Driving Reminder

Function	Description
Automotive Fault Alarm	Alarm when the vehicle fails Fault code reading, Freeze Frame query, The device cache fault data stream, and GPSLOG storage failure. Sent via GPRS to the platform, the platform fault content and the possible causes of the fault code and freeze frame data. In order to avoid high maintenance costs resulting from the failure to expand, fault alarm is triggered when failure occurs.
Safe Driving Reminder	Maintenance Reminder Alarm Reminded Fatigue Driving Alarm Parking Overtime Without Ignition Off Alarm Engine Overheat Alarm Engine Revolution Over Speed Alarm Rapid Acceleration Alarm Abrupt Deceleration Alarm

### 2.3.4 Integrated Functions

Function	Description
Monitor Function	Monitor function helps driver to know the status inside the car, and provide analysis report

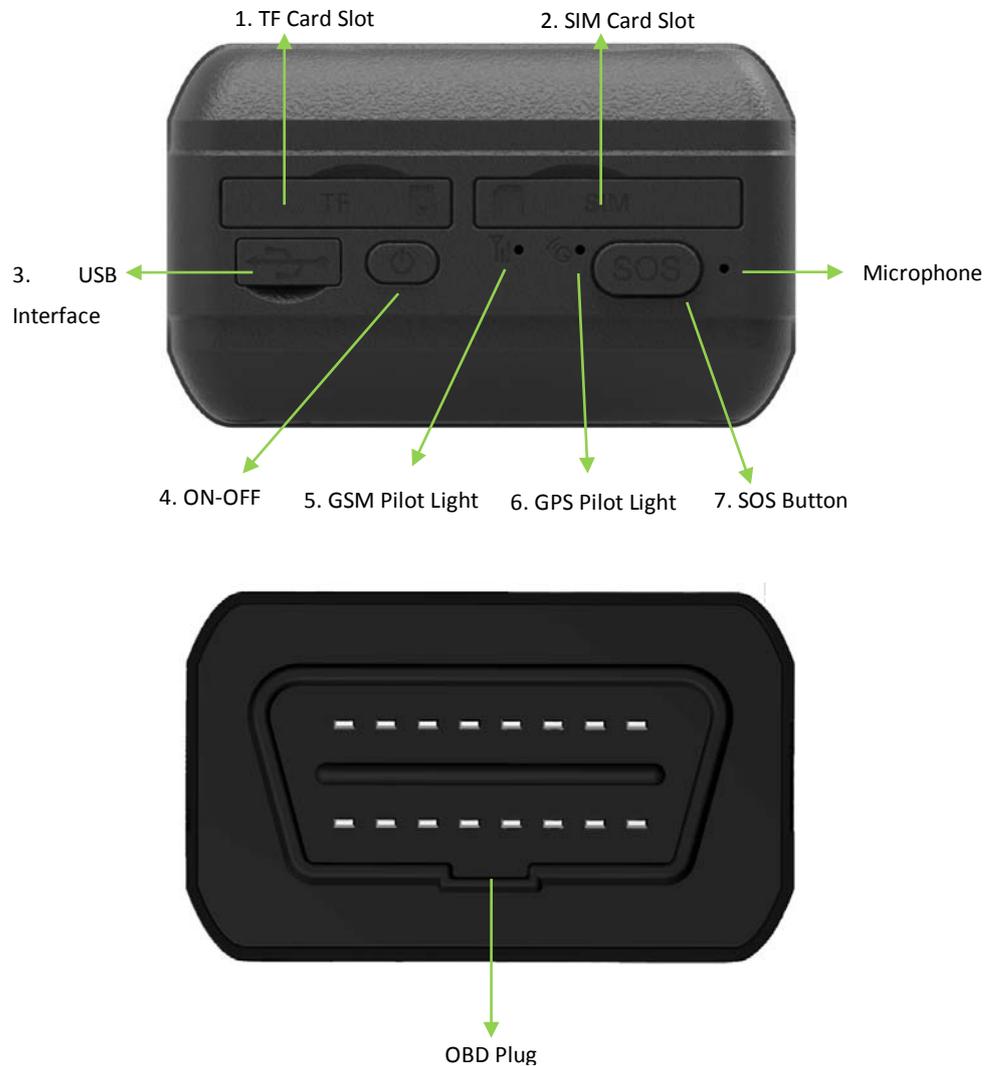

File Name	MEITRACK TC68 User Guide	Creator	Renny Lee
Project	TC68	Creation Date	2012-07-13

Sub Project	User Guide	Page	6 of 26
Revision	V1.5	Confidential	External Documentation

	when it has been stolen.
OTA Remote Update Feature	OTA (Over the Air) enable terminal firmware upgrade to match the latest software.
GPS Tracking Recorder Function	When the GPS tacks the position, the terminal will record car running track preset time. Track record can be read by the software of the <Meitrack Manager>, enable to store a total of 130,000records.
GPS&GSM Tracking	When the GPS cannot receive signals, the GSM base station will use the secondary positioning, to ensure that any time can be found in the vehicle location.
GPS Blind Spot Report	When entering the GPS signal area and leave no signal area, the terminal at the meeting sent the report to remind platform.
GSM Blind area storage/Replenish Alarm	GSM blind area can not be normal to send the data, the data will be automatically stored and auto-complete recovery of the GSM signal transmitted to the platform, to ensure that the trajectory is not lost. Built-in FLASH 8M, GPRS cache 8000,the SMS cache 256.
Mileage Report	Each GPRS data which will contain the mileage of the car, which can modify the initial use the terminal default value of the original car odometer value.

### 3. Exterior

NO.	Name	Function
1	TF Card Slot	TF maps card slot
2	SIM Card Slot	SIM card slot
3	USB Interface	USB Interface enables to charge and connect the computer for the parameters set and software upgrade.
4	ON-OFF	In the case of shutdown, keep to press the ON-OFF power switch for two seconds, and the device is beeping and on. In the case of turn on, keep to press the ON-OFF power switch for two seconds, and the device is beeping and off. In the case of hibernation, shortly press enable to wake up the device, and the indicator flashes slowly after 10 seconds.
5	GSM Pilot Light	GSM Pilot Light indicates that the device receives GSM signal. Details in "4.3 Pilot

File Name	MEITRACK TC68 User Guide	Creator	Renny Lee
Project	TC68	Creation Date	2012-07-13

Revision	V1.5	Confidential	External Documentation

	(Green)	Light”
6	GPS Pilot Light (Blue)	GPS Pilot Light indicates that the device receives GPS signal. Details in”4.3 Pilot Light”
7	SOS Button	In the case of emergency, keep to press the button for two seconds, and the device will beep in “BI”to alert users.  Authorization number from 1-3 and will default to three turns dial-up, until the first call could not be pick up. In addition, SMS will be sent to the authorized numbers. GPRS will be sent to positioning platform when the GPRS is available.  Hibernation mode, shortly press to wake up the device.
8	Microphone	The microphone is automatically enabled, when the monitor function is on.
10	OBDII Standard Plug	Insert the OBD II interface, and directly access to electricity and to read the vehicle’s diagnostic data.

## 4. Quick Operation Instruction

### 4.1 Insert the SIM Card and TF Card

*Notice: Please turn off TC68 before insert the SIM card and TF Card*

#### SIM Card:

Remove the cover of SIM card and insert SIM card as picture (chip down),then recover it.

Notice:

- Make sure there is enough charge (test it by SMS and Call after the SIM card inserted );
- Make sure turn off the PIN function of the SIM card ;
- Make sure you have set Caller Identification function if you want so.

Insert SIM Card

Insert TF Card

#### TF Card :

Remove the cover of TF card and insert TF card as picture (chip down), then recover it.

### 4.2 Charge the Battery

Please charge TC68 for at least 3 hours by the USB cable while the first using. To short the charging time, please turn off TC68 while charging.

### 4.3 LED Indications

File Name	MEITRACK TC68 User Guide	Creator	Renny Lee
Project	TC68	Creation Date	2012-07-13
		Update Date	2012-11-28
Sub Project	User Guide	Page	9 of 26
Revision	V1.5	Confidential	External Documentation

Press and hold the Power On/Off button for 3~5 seconds to turn on/off TC68. Once insert TC68 into OBD II Port in the vehicle, the buzzer will alarm BI .

GPS LED (Blue)	
Status	Description
On	Charging
Flashing (every 5 secs.)	Sleeping
Flash (1 sec on, 1 sec off)	No GPS fix or initializing
Off	GPS fix
GSM LED (Green)	
Status	Description
On	A call is coming in or busy
Flashing (every 5 secs.)	Sleeping
Flash (1 sec on, 1 sec off)	No GSM signal or initializing
Off	TC68 is connected to GSM network

#### 4.4 GPS Tracking

This location-tracking for knowing the current location of TC68, to ensure normal function of the GPS signal.

- Call the SIM card number embedded in TC68, hang up till the dial sound 2-3 times, as follows:

Report description:

Now,110727 02:48,V,16,23Km/h,61%,http://maps.google.com/maps?f=q&hl=en&q=22.540103,114.082329  
&ie=UTF8&z=16&iwloc=addr&om=1

Content	Description	Note
Now	Current Location	Alarm Type
110721 16:40	Date & Time: 21 July, 2011, 16:40pm	Date & Time in YYMMDD HH:MM
V	No GPS fixed	GPS Status Indicator: A = valid, V = invalid
10	GSM signal=10	GSM Signal , (1-32)signal is stronger while the value is larger; above 12, GPRS achieve

		normal level.
0Km/h	Speed=0	KM/h. Decimal digit
97%	Battery Power: 97%	Battery Power Balance (Percentage)
<a href="http://maps.google.com/maps?f=q&amp;hl=en&amp;q=22.540103,114.082329&amp;ie=UTF8&amp;z=16&amp;iwloc=addr&amp;om=1">http://maps.google.com/maps?f=q&amp;hl=en&amp;q=22.540103,114.082329&amp;ie=UTF8&amp;z=16&amp;iwloc=addr&amp;om=1</a>	Latitude: 22.540103 Longitude: 114.082329	Google Maps Web Link with Latitude and Longitude. Click on the link to get the location.

If your mobile cannot visit HTTP websites, input the latitude and longitude into Google Maps (maps.google.com) as the following picture shows to get the position:

### More SMS commands

You can configure TC68 by mobile phone or by computer using the MEITRACK Parameter Editor.

For more details, please refer to part **4.5 Configure by Computer**.

Note:

1. Password is 4 digits only and defaulted as 0000. You can change the password by Parameter Editor and SMS command.
2. TC68 will only accept commands from a user with the correct password and report SMS report to the user. If preauthorized phone number was set, only this phone number can receive SMS reports.

#### 4.4.1 SOS– A71

This command is to set the SOS emergency communications number, call the phone number, inform the location by SMS and other SMS additional features at the same time.

The content of Mobile Phone SMS:

0000,A71,Function Number 1, Function Number 2, Function Number 3 Sent to the embedded SIM card numbers

Copyright © 2012 Shenzhen Meiligao Electronics Co., Ltd. All rights reserved.

File Name	MEITRACK TC68 User Guide	Creator	Renny Lee
Project	TC68	Creation Date	2012-07-13
		Update Date	2012-11-28
Sub Project	User Guide	Page	11 of 26
Revision	V1.5	Confidential	External Documentation

(tips: “,” should be English comma and no space before and after the comma)

TC68 automatic reply SMS:

**IMEI,A71,OK** Prompts successful, successfully set SOS emergency communications number.

When you press the SOS emergency button, TC68 will dial 3 preauthorized phone numbers. It will stop dialing when one number answers.

Note: the default value is empty. The function numbers should be added “,” to avoid setting failure. The last function number doesn't need a “,”. For example:

**0000,A71,13500000000,,**

**0000,A71,13500000000,13600000000,**

**0000,A71.13500000000,13600000000,13700000000**

To clear the combination of functions directly sending **0000,A71**

(If this function can't be achieved, please add your Country and Area Code before your phone number when you set the preauthorized numbers, or you can also consult your local mobile operator.)

#### 4.4.2 Listening-in (Voice Monitoring) – A72

This command enables users to listen-in to the surrounding environment. Configuring this feature will allow the devices to confidentially and automatically answer and allow listening-in, one-way voice communication.

The Content of Mobil Phone SMS:

**0000,A72,Monitor Number 1,Monitor Number 2** Sent to the embedded SIM card numbers.

**IMEI,A72,OK** Successfully set monitor number.

When the preset monitor number calls the TC68, the device will answer automatically and enter into the listening state. The device will not emit any sound.

Note: the default value is empty, if the function numbers are less than three while setting, it must be added “,” to avoid setting failure. To clear the combination of monitor numbers directly sending **0000,A72**

(If this function can't be achieved, please add your Country and Area Code before your phone number when you set the preauthorized numbers, or you can also consult your local mobile operator.)

#### 4.4.3 Smart Sleep Mode – A73

This command enables the sleep mode function. In this mode, logging, timing and location are all disabled.

The Content of Mobile Phone SMS:

**0000,A73,sleep levels** Sent to the embedded SIM card numbers.

TC68 automatic reply SMS:

**IMEI,A73,OK** Prompt successfully.

File Name	MEITRACK TC68 User Guide	Creator	Renny Lee
Project	TC68	Creation Date	2012-07-13
		Update Date	2012-11-28
Sub Project	User Guide	Page	12 of 26
Revision	V1.5	Confidential	External Documentation

To restart the Log or regular position, you must first cancel the sleep mode.

Note:

X=0, turn off sleep mode (default)

X=1, normal sleep. GSM module work, GPS module work by sleep mode intermittently. The device can work 25% longer than no sleep mode. Note: this is not recommended for users who set "track by interval" or short time interval, because it will affect the completeness of tracking.

X=2, deep sleep, the tracker will enter this mode after it is inactive or stationary(No SOS/any triggered by the button/input/incoming calls/message) for 5 minutes. GPS module stops working and GSM module enters sleep mode. The tracker remains in this mode until it is activated by SOS/any triggered by the button/input/incoming calls/message. After that, it will repeat above processes.

Note: TC68 can enter sleep mode under movement , and movement can't wake TC68 from sleep mode.

In any condition, the device will directly quit the sleep mode and back to normal working mode by SMS or GPRS command to turn off the sleep mode.

#### 4.4.4 Time Zone – B35

This command modifies the SMS report to display the correct local time. Default Beijing time, GMT480.

Please follow below instructions for time zone modification.

The Content of Mobile Phone SMS:

0000,B35,480 Sent to the embedded SIM card numbers.

TC68 Automatic Reply SMS:

IMEI,B35,OK Set the time zone successfully.

Note: this value is your TC68's IMEI number. The device will send this data automatically and these numbers don't represent anything significant to the functionality of the tracker. Below the same applies.

#### 4.4.5 More Settings

You can configure TC68 by mobile phone or by computer using the Meitrack Manager to Setting Multiple Software. For more details, please refer to Configuration by Computer

**For more details regarding SMS commands, please refer to MEITRACK SMS PROTOCOL.**

### 4.5 Configure by Computer

The chapter mainly describes the simple configuration by Meitrack Manger. Please read Meitrack Manager User Guide to know the complete functions.

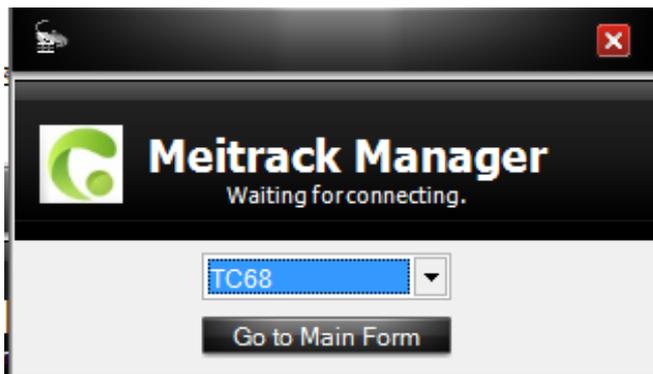

Connect the USB cable to the computer and TC68.

Connect the tracker to your computer via USB cable as the picture below:

File Name	MEITRACK TC68 User Guide	Creator	Renny Lee

#### 4.5.1 SMS Tracking

##### Select Column 2: SMS Tracking

The screenshot shows the 'SMS' configuration page in Meitrack Manager. The interface includes the following fields and options:

- SMS Password:** 0000
- SMS Timezone:** 480 Minutes
- Authorization No.:** 15013636785
- SOS Call:**
- Reject Incoming Call:**
- Auto Answer Incoming Call:**
- Location Report:**
- SOS Alarm:**
- Low Battery Alarm:** Low Battery
- Speeding Alarm:** Speeding
- Max Speed:** 0 Km/h
- GPS Blind Alarm:**
  - Enter Alarm:** No Fix
  - Exit Alarm:** Fix
- Monitor Phone No.:** (empty)
- SMS Track No.:** (empty)
- SMS Report Interval:** 0 Minutes
- Auto Report Times:** No Limit

Item	Description
<b>User Password</b>	0000 SMS password for sending SMS commands ,defaulted as 0000.
<b>SMS Time Zone</b>	Default time zone of the tracker is GMT 0. You can use this comment to correct it to your local time for SMS report. Time zone of SMS report and GPRS data package report is independent. = 0, GMT 0 (default); = [-32768,32767], set time difference in minutes to GMT. Example: Beijing Time(China)=480.
<b>Authorization Phone Number</b>	Authorize phone number(s) for receiving SMS reports and select events to be included in the SMS.
<b>Press SOS to Call</b>	Press SOS to call the authorized phone.
<b>Reject Incoming Call</b>	Reject when the authorized phone calling in
<b>Auto Answer</b>	Auto answer the incoming authorized phone call for conversation via SOS without press.

File Name	MEITRACK TC68 User Guide	Creator	Renny Lee

<b>Incoming Call</b>	
<b>Report Location after Calling in</b>	Report location via SMS after the incoming call is hung up.
<b>SOS Alarm</b>	Send SMS alarm to the authorized phone number when press SOS button, Right Textbox will show the corresponding txt head, default as "Call the police"
<b>Low In-built Battery Alarm</b>	Send SMS alarm to the authorized phone number when voltage of the inbuilt battery is below 3.5V. Right Textbox will show the corresponding txt head, default as "Low battery"
<b>Speeding Alarm</b>	Send SMS alarm to the authorized phone number when the speed of tracker exceeds the preset max speed. Right Textbox will show the corresponding txt head, default as "Speeding"
<b>GPS Blind Area Alarm</b>	Enter Alarm: Send SMS alarm to the authorized phone number when tracker enter into GPS blind area or can't receive GPS signal. Right Textbox will show the corresponding txt head, default as "Not Fix" Exit Alarm: Send SMS alarm to the authorized phone number when tracker exits GPS blind area or receive GPS signal. Right Textbox will show the corresponding txt head, default as "Fix"
<b>Sleep Mode</b>	Enter Alarm: Send SMS alarm to the authorized phone number when tracker enters into sleep mode. Right Textbox will show the corresponding txt head, default as "Sleep" Exit Alarm: Send SMS alarm to the authorized phone number when tracker wakes up from sleep mode. Right Textbox will show the corresponding txt head, default as "Not Sleep"
<b>Distance Interval Alarm</b>	Send distance interval report to the authorized phone number when tracker reaches the preset distance. Right Textbox will show the corresponding txt head, default as "Distance Interval Alarm".
<b>Reboot</b>	Send SMS alarm to the authorized phone number when tracker reboots.
<b>GEO Fence Alarm</b>	GEO fence is a circle with preset radius. Maximum of 8 Geo-fence waypoints can be set. Enter Alarm: Report sent when tracker enters Geo-fence. Right Textbox will show the corresponding txt head, default as "Enter GEO". Exit Alarm: Report sent when tracker exits Geo-fence. Right Textbox will show the corresponding txt head, default as "Exit GEO". Add New Fence: Set radius latitude and longitude, or draw Geo-fence on map directly in circles.
<b>Monitor Phone No.</b>	Authorize phone numbers to make silent calls to the tracker. The tracker will answer automatically. There is no voice indication when the call is in progress. Max 2 monitor phone numbers, with 16 characters each. If no preset phone number, the value is left empty (default).
<b>SMS Track No.</b>	SMS Tracking Number: Authorize phone numbers to receive SMS report by time

Item	Description
<b>GPRS Connection Mode</b>	Close: Close GPRS upload time. TCP: TCP is a stable connection. It is recommended to use this model (Default). UDP: UDP can save data flow, while it is unreliable.
<b>IP/Domain and Port</b>	Set main server's IP and port. Default IP: 67.203.13.26 Default Port : 6800
<b>Backup IP/Domain and Port</b>	Backup server's IP and port to avoid losing data when main server is down.
<b>APN, APN Username, APN Password</b>	Max 32 bytes. If no username and password, leave them blank. China Mobile APN: CMNET, China Unicom APN: NINET, no username and password. APN set default value as CMNET, APN user name and password as blank, so CMNET users can use device once it insert the card with GPRS function.
<b>GPRS Time Interval</b>	Track by time interval via GPRS Set time interval for GPRS tracking, unit in 10 seconds ( fill in 6 means 60 seconds) = 0, cancel GPRS tracking by time interval; max time interval = 65535*10 seconds. Default setting of GPRS interval time is 6*10s.
<b>GPRS Report Times</b>	= 0, no limit, unlimited times for report(Default); = [1,65535], set report times, tracker will stop reporting when reaching the preset times.
<b>GPRS Time Zone</b>	GPRS time zone minute = 0, GMT 0 (Default) GPRS time zone minute = [-32768,32767], set different time zones.
<b>Save</b>	Write current settings into the tracker.

### 4.5.3 Fault Record

Steps:

- 1) Click  Read Data icon, TC68 will record the previous fault code from the car to the Meitrack Manager.
- 2) Select TC68 and the period, click  Search icon. It will show out all fault records of this period. If no data, it means there is no fault of this car.  
Click Fault Code, The list of fault record will be shown as below:

File Name	MEITRACK TC68 User Guide	Creator	Renny Lee
Project	TC68	Creation Date	2012-07-13
		Update Date	2012-11-28
Sub Project	User Guide	Page	20 of 26
Revision	V1.5	Confidential	External Documentation

- 4) Please lead out the fault record in EXCEL after reading, and typing it to the 4S shop for repairing. This record will avoid some 4S shops charge too much repaired fee to the car owner.

**Please refer to MEITRACK SMS Protocol and MEITRACK GPRS Protocol, if you want to know more GPRS Setting.**

#### 4.6 Platform Tracking

Trade Manager OBDII version will log in via IMEI number:

Account: IMEI Number (there is 15 numbers on the device sticker)

Default Password: 0000(Password can be changed by yourself after logging)

#### 5. TC68 Installation

TC68 is a plug and play (PNP) model, simple and without wires connection.

When plug the TC68 to the car connector, it will sound BI one time, and all LED will begin blinking, it means plug successfully.

Please check the device connected completely or not, to avoid any moving.

### 5.1 Plug Car Connector Directly

### 5.2 Use the Extension Cord to Install (Options)

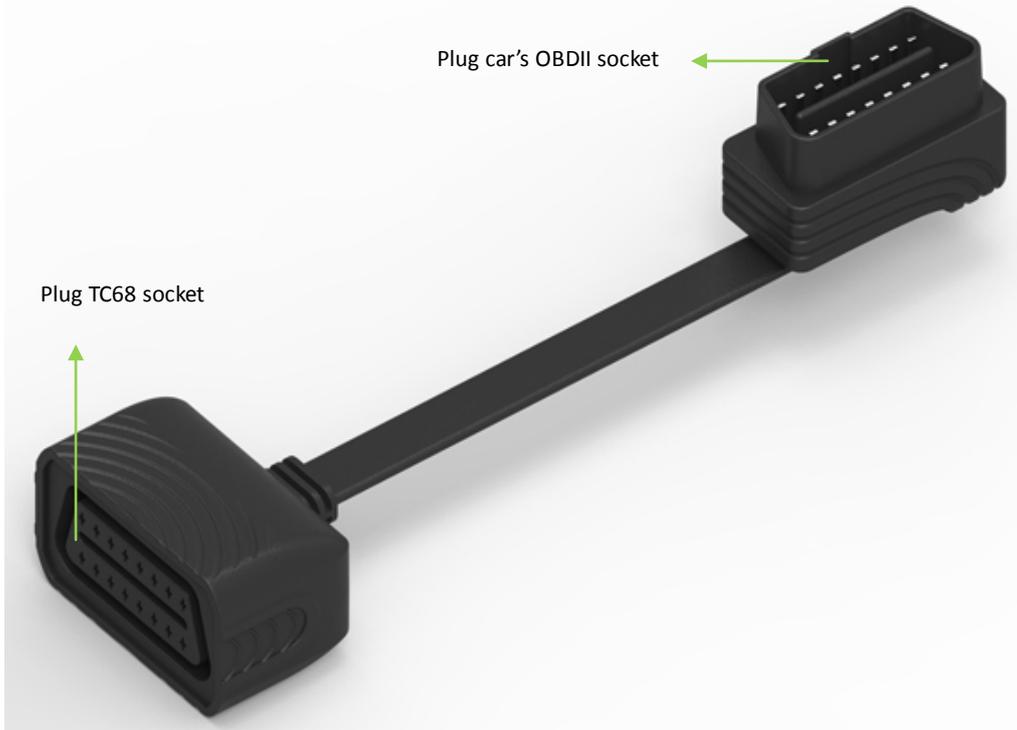

Use the extension cord on the condition of narrow space for installation, in weak GPS signal, or for hidden purpose.

When install the extension cord, please plug the male connector to Car's OBDII socket, plug the female connector to TC68 socket.

- 1) Affixed two small suede Velcro to the labeled TC68 surface and the connected surface of extension cord.
- 2) Plug the male connector of the extension cord to the car OBDII connector.
- 3) Find a hidden space under the instrument desk, and affix the biggest surface of Velcro on the car.
- 4) Affix the TC68 with Velcro directly to the Car Velcro.

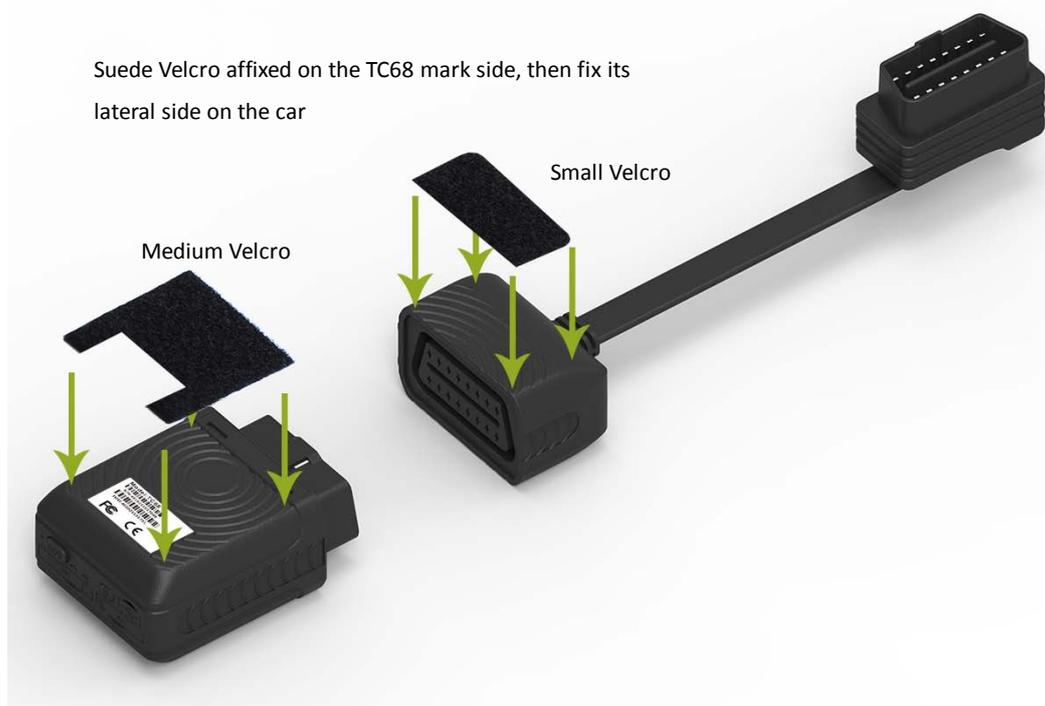

You can use other ways such as tie it up with the car, if there is the suitable space to install.
